## Personal Data

1

In 2014 a Facebook quiz invited users to find out their personality type

2

The app collected the data of those taking the quiz, but also recorded the public data of their friends

3

About 305,000 people installed the app, but it gathered information on up to 87 million people, according to Facebook

4

It is claimed at least some of the data was sold to Cambridge Analytica (CA) which used it to psychologically profile voters in the US
