Let's Calculate

As much as we like to believe that payroll software can solve all our problems – this is not so. We need to know how to calculate a payroll Manually or else we cannot identify any issues that arise or solve any problems or exceptions to the usual run of the mill.

2

www.21Academy.education

How is this going to work?

You will be asked a question to answer or calculate. Please write your answer in the chat to me privately. This will give me an idea of where you might have any issues.

After that the answer will be given.
